

BAPI BISWAS

Senior Software Engineer | Backend & Full Stack

📍 Kolkata, West Bengal, India | 📞 +91 9093595084 | ✉️ bapibiswas703@gmail.com | 🔗 [linkedin.com/in/bapi-biswas](https://www.linkedin.com/in/bapi-biswas)

PROFESSIONAL SUMMARY

Software Engineer with ~7 years of experience building scalable, high-performance applications across SaaS, E-Commerce, FinTech, and Real-time systems. Expert in Node.js, NestJS, GraphQL microservices, and distributed systems architecture. Hands-on experience integrating AI/LLM capabilities (Claude, OpenAI, LangChain) into production applications, building AI-powered automation workflows with n8n, and leveraging Supabase for scalable backends. Proven track record of designing event-driven platforms, integrating global payment gateways, and leading backend migrations. Actively seeking Senior Software Engineer / Backend Engineer / Full Stack Engineer roles in companies building AI-powered products, distributed systems, and global-scale SaaS.

EXPERIENCE

Senior Software Developer | Webskitters Technology Solutions Pvt. Ltd.

Oct 2021 – Present (4+ years) • Kolkata, West Bengal, India

- Designed and scaled microservices-based SaaS systems using Node.js, NestJS, TypeScript, and GraphQL (Apollo Server, Federation, Subscriptions).
- Built event-driven distributed systems with Kafka and Redis Pub/Sub for real-time messaging and notifications.
- Developed and optimized GraphQL APIs (REST + subscriptions) and integrated gRPC for inter-service communication.
- Integrated global payment gateways: Stripe, Tap Payments, and Moyasar.
- Migrated ORM stack from Sequelize to Drizzle, achieving significant query performance improvements.
- Built real-time chat and notification systems using Socket.IO + Redis.
- Worked with AWS (EC2, S3, Lambda), Docker, Firebase, Git, GitHub, and GitLab in CI/CD pipelines.
- Managed and delivered multiple projects on schedule while maintaining high code quality standards.

Software Developer | Bijoy Business Solution and Services Pvt. Ltd.

Apr 2020 – Sep 2021 (1 year 6 months) • Durgapur, West Bengal, India

- Designed and developed RESTful APIs for an E-Commerce platform (zeropower.in) and wrote comprehensive test cases.
- Built and migrated databases; optimized queries for performance at scale.
- Integrated payment gateways and logistics solutions.
- Developed real-time chat features and worked on CMS backend APIs.
- Contributed to full-stack web development using Node.js, Express.js, Angular 8, PostgreSQL, and MongoDB.
- Deployed and maintained applications on AWS EC2.

Web Developer | Codeachi Technologies Pvt. Ltd.

Jan 2019 – Mar 2020 (1 year 3 months) • Kolkata, West Bengal, India

- Developed frontend and backend for web applications using Node.js, PHP/Laravel, and Angular.
- Contributed to CMS product features and REST API integrations.
- Supported AWS EC2 deployments and maintained production servers.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express.js, Laravel, PHP

Frontend: React.js, Next.js, Vue.js, Angular 8, TypeScript, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Firebase, Supabase

AI & Automation: Claude API (Anthropic), OpenAI API, LangChain, n8n (Workflow Automation), AI Agents, LLM Integration, Prompt Engineering

APIs & Architecture: REST, GraphQL (Apollo Server, Federation, Subscriptions), gRPC, Microservices, SaaS, API Gateways

Event-Driven Systems: Apache Kafka, Redis Pub/Sub, Socket.IO

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Firebase, Supabase

Version Control: Git, GitHub, GitLab

Databases/ORMs: Sequelize, Drizzle ORM

Operating Systems: Linux, Windows

KEY ACHIEVEMENTS

- Integrated LLM APIs (Claude, OpenAI) into SaaS backend to power AI-driven features, reducing manual processing time significantly.
- Built automated business workflows using n8n, connecting 10+ services and eliminating repetitive manual tasks.
- Architected a multi-tenant SaaS platform with GraphQL federation across 5+ microservices, reducing API latency by 40%.
- Led ORM migration from Sequelize to Drizzle, cutting average query execution time significantly.
- Designed and deployed real-time notification system handling 10K+ concurrent users using Kafka + Redis + Socket.IO.
- Integrated 3 global payment gateways (Stripe, Tap, Moyasar) supporting multi-currency transactions.

KEY PROJECTS

AI-Powered SaaS Features (LLM Integration)

- Integrated Claude and OpenAI APIs into a SaaS backend to automate content generation, data extraction, and intelligent workflows. Tech: NestJS, Claude API, OpenAI API, LangChain, PostgreSQL.

Automation Workflows with n8n

- Built end-to-end business automation pipelines using n8n connecting CRMs, databases, notification services, and third-party APIs. Tech: n8n, REST APIs, PostgreSQL, Supabase, Webhook integrations.

Supabase Backend Integration

- Leveraged Supabase (PostgreSQL + Auth + Realtime + Storage) as a scalable BaaS layer for rapid SaaS feature development. Tech: Supabase, PostgreSQL, Row Level Security, Realtime subscriptions.

Multi-Tenant SaaS Platform

- Built microservices architecture with NestJS + GraphQL Federation. Tech: NestJS, GraphQL, Kafka, Redis, PostgreSQL, AWS.

Real-Time Chat & Notification System

- Designed pub/sub based notification engine with Socket.IO + Redis supporting thousands of concurrent connections.

E-Commerce Platform (zeropower.in)

- Full-stack E-Commerce platform with payment gateway & logistics integration. Tech: PHP, Laravel, MySQL, AWS, Firebase.

EDUCATION

GNIT – Software Engineering | National Institute of Information Technology (NIIT)

2015 – 2018

Higher Secondary (B.Com) | Balia High School, WBCHSE

2013
